

# Traqpoll Service

Unique *observation service* to determine the *pollution causes and impacts*.

*Multi-source* and *complementary* data approach.

## Multi-source dashboard

### Satellite data

Comprehensive study of air and water quality, vegetation health and climate conditions

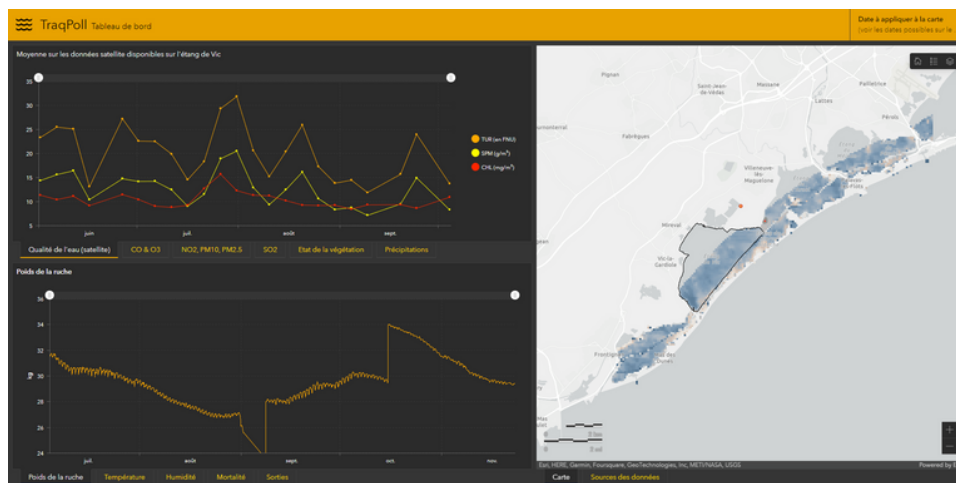

### Boat drones

In situ water quality study

### Connected hives

In situ study of the pollution and climate impact on living organisms

## Prices (excl. VAT)

Dashboard set-up

20 000 €

Annual subscription for update

5 000 €

*Air quality, vegetation health, connected hives data*

Dashboard set-up

20 000 €

Annual subscription for update

5 000 €

*Air quality, water quality, drone ship data*

Dashboard set-up

30 000 €

Annual subscription for update

8 000 €

*Air quality, vegetation health, water quality, drone ship data and connected hives*

## Solution objectives

- ✓ Monitoring the environmental state of an area
- ✓ Identification of anthropogenic impact
- ✓ Adaptation to climate change
- ✓ Evaluation of public policy impact
